4500+ Topics Covered

- **4500+ Topics to be covered, through *Smart Solution*. It can be used as *REVISION NOTES***
- ***SMART Solutions* will be provided so that you learn how to approach a question in the exam, even if you don't have the full knowledge of the topic given.**

EXAMPLE:

Let's see how smart solution can be effective through UPSC PRELIMS QUESTION OF 2018.

Q1: Consider the following statements:

- 1. In the first Lok Sabha, the single largest party in the opposition was the Swatantra Party.**
- 2. In the Lok Sabha, a "Leader of the Opposition" was recognised for the first time in 1969.**
- 3. In the Lok Sabha, if a party does not have a minimum of 75 members, its leader cannot be recognized as the Leader of the Opposition.**

Which of the statements given above is/are correct?

- (a) 1 and 3 only
- (b) 2 only
- (c) 2 and 3 only
- (d) 1, 2 and 3

A. Correct Options: (b)

Explanation:

Leader of the Opposition

- **Statement 1 is incorrect:**
 - **1952 elections** The Congress had won 364 out of 489 Lok Sabha seats in the first ever general election held in India. Its vote share was 45 per cent.

- The CPI was the second party with just 16 seats. The Swatantra Party was an Indian liberal conservative political party that existed from 1959 to 1974.
- Statement 2 is correct:
 - Leader of opposition was recognized for the first time in 1969.
 - The leader of Opposition in the Lok Sabha and the Rajya Sabha were accorded statutory recognition in 1977. They get same salaries and allowances that are equivalent to a Cabinet minister – paid by the govt.
- Statement 3 is incorrect:
 - In each House of Parliament, there is the 'Leader of the Opposition'. The leader of the largest Opposition party having not less than one-tenth seats of the total strength of the House is recognized as the leader of the Opposition in that House.

Total 10% seat means

- In Lok Sabha 10% of 543 = 55 (In 3rd statement, it says "minimum of 75 members"), hence it's incorrect.
- In Rajya Sabha 10% of 245 = 25

Smart Solution

- In the first reading most of the candidates will find that statement 1 & 2 are very factual in nature and hard to solve. In this case they skip the question and move on to the next one.
- But, If candidate reads the question further he/she will realize that statement 3 was in news (Congress got only 44 seats in last Lok Sabha elections) and is straight away wrong. In the Lok Sabha, if a party does not have a minimum of 10% (55) members of the total strength (543), its leader cannot be recognized as the Leader of the Opposition.
- Conclusion: Even if you have no idea about statement 1 and 2 and are updated with the current affairs you can straight away eliminate options (a), (c), and (d) and can mark option '(b)' as the correct answer.
